Hi Kerry,

Thanks for the email. From your email below it looks like we need more information on SS/CC for 8329-61. Do we also still need more information about pfas in the new container and in the products per our discussion this morning?

Just looking for clarification so I am confident I understand the issue.

Many thanks,
Jackie

Further to the product chemistry memorandum of 3/1/2021 ("*Summary of Product Chemistry Review for "Anvil 2+2 ULV" (EPA Reg No 8329-61, DP Barcode No 461161) "Anvil 10+10 ULV" (EPA Reg No 8329-62, DP Barcode No 461160) "Natular 2EC" (EPA Reg No 8329-82, DP Barcode No 461163) "Natular 20EC" (EPA Reg No 8329-106, DP Barcode No 461164) "Merus 3.0" (EPA Reg No 8329-108, DP Barcode No 461162) -Amendments to Replace and Add Containers Types*) Shyam and I took a closer look at the Clarke submission, specifically with regards to storage stability and corrosion characteristics data and have determined that while the data were presented on a group of five products, the submitted storage stability and corrosion characteristics data are in fact acceptable for "Anvil 10+10 ULV" (EPA Reg No 8329-62); "Natular 2EC" (EPA Reg No 8329-82); "Natular 20EC" (EPA Reg No 8329-106); and "Merus 3.0" (EPA Reg No 8329-108).

Storage stability data for "Anvil 2+2 ULV" (EPA Reg No 8329-61) was not included in the submission (MRID No. 51436401) and remains a deficiency.

Kerry

Subject: Clarke PC Review Conclusions and Next Steps

When: Wednesday, March 03, 2021 8:30 AM-9:00 AM (UTC-05:00) Eastern Time (US & Canada).

Where: Microsoft Teams Meeting

Sensitivity: Private

Quick discussion on next steps, given the data submitted by Clarke for their new containers were found unacceptable. According to the review SS/CC data need to be product specific and shouldn't be bridged.
